

# Cassette

Unionaire new Cassette split system is designed to provide high quality, economically and reliable cooling or heating for a large variety of applications.

A Cassette split system consists of an outdoor unit located outside the space to be air conditioned and an indoor unit located inside, both units are connected by refrigerant piping and control wiring.

- CAS024CO**  
1.5-Ton Cool Only
- CAS024HP**  
1.5-Ton Heat Pump
- CAS024CO**  
2-Ton Cool Only
- CAS024HP**  
2-Ton Heat Pump

- + 4 way discharge louvers
- + Ultra quiet operation
- + LCD wireless remote
- + "Dry" mode reduces water vapor by computerized dehumidification
- + "Sleep" mode provides a suitable energy saving environment
- + 24 hour programmable timer

- + Automatic and manual selection of 3-stage fan speed
